To whom it may concern:

Re:

Ken VahnDijk

Rock Solid Waterproofing

I had the pleasure of entering into a contract with Rock Solid Water proofing in June of 2007. The district contracted to have two concrete and masonry buildings waterproofed. The buildings were an uncommon challenge due to there structure and usage. The buildings served on the upper level as spectator seating and underneath as team rooms, concession stand, announcer's booth, and maintenance storage. Construction included multi colored masonry, concrete decks, tilt up concrete walls, and bolt in aluminum seating.

I interviewed four waterproofing contractors. Two of the contractors felt they were too busy and or were unable to ensure they could meet the scope of the project. I selected Rock Solid due to there product knowledge, color match capabilities, and Ken's attitude. Throughout the project I was not disappointed by Rock Solid's ability to meet their schedule, install an aesthetic product, deal with vandalism on the sight, complete necessary documentation, and provide good customer service regarding color selections and questions/concerns.

I would strongly recommend Ken VahnDijk and Rock Solid Waterproofing for any project he is being considered for. Should you wish further information please feel free to contact me.
