Rock Solid Waterproofing provided services on the MLK/Grand Ave 99E Viaduct project. While working with Max J. Kuney, Rock Solid Waterproofing supplied an exceptionally professional product. Working with a tight schedule that involved non-conductive weather conditions, they stayed on schedule, worked professionally, adhered above and beyond to the safety standards that were required by the general contractor and kept costs within the original estimated budget.

Max J. Kuney will definitely take into consideration pursuing Rock Solid Waterproofing on future projects where their services may be needed.

Randy Dumm

A handwritten signature in blue ink that reads 'Randy Dumm'.
