Dear Ken,

I want to again express my appreciation for your excellent work in reconstructing and surfacing the large decks at 3611 and 3621 S. W. Humphrey Blvd. As you know, throughout the job and as I saw it progress, I repeatedly told both you and David that the work you were doing was of the highest caliber.

The nature of the job was especially challenging. It required detailed and thoughtful analysis and execution, to provide both a sound base on the existing structure, and drainage slopes to accommodate the curving shapes over large expanses of deck. You not only had the know-how, but took the time needed to accomplish this. And you did so on your own time at the fixed agreed price.

I have had many contacts and experiences with construction and contractors over five decades. Throughout this time, in my work as an attorney I had a number of clients in the construction industry and for many years represented the Associated General Contractors of the State of Oregon and Southwest Washington. In addition, I constructed several homes. From these experiences I became keenly aware of the broad spectrum of relative quality performed by contractors. Your work on these challenging decks is certainly at the very top of the quality spectrum.

Thanks again for the great job!

Sincerely,

A handwritten signature in black ink, appearing to read "Lewis K. Scott", with a long horizontal flourish extending to the right.
